

## Video Doorbell Arenti VBELL1 3MP 2K

Video Doorbell Arenti VBELL1 3MP 2K

Ref: 6972055683825

Arenti VBELL1 3MP 2K video intercom

Arenti video intercom is a modern solution that allows you to monitor the entrance of your home or office conveniently and efficiently. Thanks to its advanced technology and robust design, you will feel safe, having an overview of what is happening on the property at any time. The device guarantees great image quality in all conditions and features a wide viewing angle. All you need to do is connect it to your phone for quick video access. The product supports two-way audio, works with iOS and Android, operates wirelessly and features an IP65 rating. The product is a winner of the 2021 Red Dot Award, a prestigious design award.

You won't miss a single detail

The device is equipped with an image sensor with effective pixels, which allows for clear and detailed images. It also has a day/night mode that automatically adjusts to lighting conditions. This means that the video intercom will allow you to see exactly who is standing on the other side of the camera and finally feel completely safe. The device's lens provides a viewing angle of 130°, which makes the video intercom monitor an even larger area, so you will also see people who are not standing directly at the intercom. You will always be sure who you are letting into your home anymore.

Notifies you of every visitor

The Arenti video intercom uses a smart sensor that automatically sends a notification to your phone when it detects human movement.

Are you waiting for someone? Or are you not expecting visitors? Now no visit will escape your attention! What's more, the device works with iOS and Android, so even if you're not at home, you have an overview of what's going on nearby. In addition, the device offers the ability to save video footage to an SD card (up to 256 GB) or the cloud, which you can view anytime, anywhere. If something disturbing is happening near your home, with Arenti you can record it!

#### Two-way audio support

The device is equipped with a built-in microphone and speaker, allowing the user to interact with people within the camera's range. Greet the courier or call the kids when they forget something while leaving the house. If an unwanted visit happens and someone wants to damage your video intercom, you will receive an instant notification on your phone. This way you can be faster and scare off the unwanted visitor.

#### Reliable performance and robust design

The video intercom is powered by a 6700 mAh battery, which allows for about 6 months of standby or 3-6 months of operation with 5-10 activations per day. One charge will provide you with almost half a year of full control. The videophone's degree of protection is as high as IP65, so it will cope well in all weather conditions. Heavy rain or freezing temperatures? Without leaving your warm home, you will quickly find out who has visited you.

#### Bezprzewodowa praca

Arenti wykorzystuje sieć bezprzewodową 2,4 GHz i współpracuje z systemami iOS oraz Android. Co więcej, wspiera Amazon Alexa i Google Assistant, co oznacza, że możesz wygodnie obsłużyć swój wideodomofon za pomocą komend głosowych. Instalacja urządzenia jest niezwykle łatwa i nie wymaga żadnego dodatkowego okablowania — możesz umieścić go w dowolnym miejscu! To Ty decydujesz!

#### Included

Camera

Wireless bell and its battery

Holder

3M sticker

Adapter

Cable

Screw pack

L screwdriver
