

Wired Air Pump Remax

Wired Air Pump Remax

Ref: 6954851211402

Remax D12L car inflator

The Remax D12L car inflator will work well for vehicles under 5 tonnes, i.e. cars, motorbikes, electric vehicles, bicycles, balls, balloons, emergency wheels, etc. It is distinguished by a pressure of max. 120 PSI and automatically stops operation when the product is fully inflated.

Convenient handling

Using the D12L will not cause you any problems. The pump is equipped with convenient buttons and the display will provide you with the most important information regarding the operating status. The lightweight and portable design means that transporting and storing the product will not be a problem.

Practical torch

Need to top up the air in your tyre, but it's dark outside? No problem! The inflator has a built-in torch for easy use in the dark. You switch it on using the power button. You can also use the SOS mode to call for help.
