

Smart power strip Gosund P1 Tuya

Smart power strip Gosund P1 Tuya

Ref: 6972391280405

Smart power strip

The Gosund power strip consists of 3 USB sockets with 15W (5V, 3A) output power and 3 standard sockets, all inputs are integrated overvoltage protection. The 15W power allows quick charging of smartphones, tablets and other devices. The strip has a switch, but it can also be controlled by a smartphone application. This allows you to switch on and off individual sockets or all at once when the need arises. The device supports only the 2.4G band so before buying it you should make sure that the router in your possession supports a given frequency.

Smart schedules

The application allows creating intelligent schedules. This gives you many possibilities to control your own home. You can turn on and off lamps, fans and other devices, while the smart timer allows you to turn off devices after a specified time. Each socket can be individually controlled. You can also create a group of devices that you will control at once.

Included:

1x GOSUND P1 15A WIFI power strip with energy metering function.

1x User manual in Polish

Manufacturer

Gosund
Model
P1
