

Filters 2-9 stops Freewell True Color VND Mist for DJI Mavic

Ref: 6972971860171

Filters 2-9 stops Freewell True Color VND Mist for DJI Mavic

Freewell True Color VND Mist set of 2-9 stop filters for DJI Mavic 3 Classic

Designed for the DJI Mavic 3 Classic drones, the True Color Variable ND 2-5 Stop and ND 6-9 Stop filters from the Mist Edition series help reduce sharpness for a more cinematic effect to your photos. The VND filters provide exposure reduction from 2 to 9 stops, allowing you to use wider aperture settings for shallower depth of field or motion blur. Thanks to True Color technology, these filters render colors faithfully while resisting dust, scratches and greasy stains. What's more, they are extremely lightweight and don't interfere with the drone's flight dynamics.

Protective coating

Made of the highest quality materials, the filters have a special protective coating that does not affect the color optics of the materials created. The filters are therefore resistant to dust and scratches, as well as fingerprints and the formation of greasy stains, so keeping them clean is no problem. At the same time, they provide the best image quality and allow you to maintain neutral image colors. Your photos will be stunning!

Included

Filters
case

- Manufacturer
- Freewell
- Model
- FW-M3C-VNDXMIST
- Compatibility
- DJI Mavic 3 Classic
- Filter type
- ND 2-5 Stop ; ND 6-9 Stop
- Optical coatings
- Dustproof, scratch resistant, oil resistant
