Filters Freewell All Day for DJI Action 3 (6 Pack)

Ref: 6972971860225

Freewell All Day set of 6 filters for DJI Action 3

The All Day Kit is a set of 6 filters designed for the DJI Action 3. The set includes ND8/PL, ND16/PL, ND32/PL, ND64/PL, ND1000, UV filters, so you can reduce the amount of light entering the lens, as well as achieve advanced effects such as reducing glare on the water surface while increasing exposure time. Create breathtaking photos and experiment with Freewell filters! You'll find a special filter storage case included.

UV Filter

Designed for both stills and video, the UV filter reduces the effects of ultraviolet radiation on your camera's sensor. For shots taken outdoors, ultraviolet radiation can affect their colors, causing unevenness in saturation and contrast. In such a case, the UV filter helps reduce the impact of UV radiation, resulting in more natural and pure colors. What's more, the UV filter helps protect the lens from dust, dust and scratches.

ND1000 filter

ND (Neutral Density) optical filters allow you to reduce the amount of light reaching the sensor of your camera or camcorder, without changing the color or tone of the photo. These filters are very useful when we need to increase the exposure time or increase the depth of field, but still maintain the right exposure. The ND1000 filter allows you to reduce the amount of light by 10 apertures, which means

that only 0.1% of the light reaches the camera sensor. As a result, you will get a blur of moving elements - such as water or clouds.

ND/PL optical filters

In the set you will find 5 different ND/PL filters. This is a combination of ND (Neutral Density) filter and CPL (Circular Polarizing) filter. They combine the properties of both filters, so you can get fantastic effects. They are used to reduce the amount of light and allow you to increase the exposure time. You can get the effect of blurring water or clouds in your photographs. Moreover, ND/PL allow you to reduce glare from surfaces such as water, glass, etc. Using the filters will allow you to get clearer, more natural landscape photos. ND/PL filters are available in various degrees of light reduction and polarization, allowing you to match them to specific lighting conditions and the effect you want.

Solid workmanship

All filters were created with attention to every detail. They are ultra-lightweight, and thanks to a special coating, they are resistant to scratches, dust and grease and guarantee the best image quality. Keeping them clean is no problem at all.

Included

Filters

case

☐Manufacturer

☐Freewell

☐Model

☐FW-OA3-ALD

☐Compatibility

☐DJI Action 3

☐Filter type

☐ND8/EN, ND16/EN, ND32/EN, ND64/EN, UV, ND1000

☐Optical coatings

☐Dustproof, scratch-resistant, oil-resistant
