

Filter set Freewell 4K Standard Day for GoPro HERO11/HERO10/

Ref: 6972971860843

Filter set Freewell 4K Standard Day for GoPro HERO11/HERO10/

Freewell 4K Standard Day filter set of 4 for GoPro HERO11/HERO10/HERO9 (black)

In this set you will find 4 ND filters created specifically for GoPro HERO11/HERO10/HERO9 cameras. The pack is suitable for making great quality footage on both cloudy and sunny days. It includes ND8, ND16, ND32 and PL. The ND filters will allow you to reduce the amount of light entering the sensor, while maintaining the neutral colors of the photos taken, while the PL filter will help control the direction of polarization of the light that passes through the filter. The product features a sturdy design and is extremely lightweight, so you can use the filters without worrying about your device.

Protective coating

For best results when shooting outdoors, the filter has gained a special coating, making it dustproof and scratch-resistant. Photos of speedway racers? Why not! Your lens won't suffer from it! What's more, the oleophobic coating prevents greasy stains and fingerprints, so keeping the filter clean will not be a problem.
