

Filter Freewell Light Pollution for GoPro HERO11/HERO10/HERO

Ref: 6972971860881

Filter Freewell Light Pollution for GoPro HERO11/HERO10/HERO

Freewell Light Pollution filter for GoPro HERO11 / HERO10 / HERO9

The Freewell LPR filter is the perfect accessory for the GoPro Hero 11 / Hero 10 / Hero 9 camera for anyone who wants to get the best quality when taking photos and videos at night! The filter reduces light pollution caused by artificial light emissions - a particularly useful accessory in locations with intense urban lighting. It makes it easy to capture stars in the sky, the Milky Way or the aurora borealis! High-quality German optical glass is used for its construction, which is characterised by exceptional wear resistance. You can easily mount it on the lens of your camera, and thanks to the lightweight aluminium alloy it does not affect the comfort of use.
