

## Filters ND 16/64/128/256 PGYTECH for DJI Mini 3 / Mini 3 Pro

Ref: 6970801339866

Filters ND 16/64/128/256 PGYTECH for DJI Mini 3 / Mini 3 Pro

PGYTECH 16/64/128/256 ND Filters for DJI Mini 3 / Mini 3 Pro

Choose an ND filter from PGYTECH and freely reduce the amount of light reaching the sensor of your DJI Mini 3 / Mini 3 Pro. It is created from Japanese AGC optical glass and aluminum, making it lightweight, yet durable and resistant. What's more, thanks to special coatings, it will also be easy to clean and install.

### Excellent image quality

Creating beautiful bird's eye shots is easier than you might think. An ND filter with values of 16, 64, 128 or 256 reduces the amount of light by 4, 6, 7 and 8 degrees (that is, by four, six, seven or eight times), respectively, allowing you to achieve longer exposure times, such as up to a few seconds or even minutes. Thanks to this, you'll be able to achieve the effect of blurring moving elements, such as water, clouds, people and vehicles. Thanks to PGYTECH, you will get an excellent artistic effect and give your photo a unique character.

### Durable and easy to clean

This product is distinguished by its extraordinary resistance and easy cleaning. Thanks to its 2-sided coating, it is waterproof, and what's more, it also repels grease. This makes it easy for you to keep it clean. It will serve you for a long time, as it also shows scratch resistance.

Made for DJI Mini 3 and DJI Mini 3 Pro

You don't have to worry about the accessory weighing down your drone and affecting its flight quality. The filter is extremely lightweight and durable, thanks to its frame made of aluminum. It also stands out for its resistance to corrosion. What's more, it is perfectly matched to the DJI Mini 3 and DJI Mini 3 Pro, so it won't disturb its balance and will allow you to have a smooth and exciting flight.

Producer

PGYTECH

Model

P-40B-12
