Universal Remote Control IR WiFi RF 433 MHz Avatto S16 Pro T

Universal IR WiFi RF 433MHz Remote Control Avatto S16 Pro TUYA - Your smart home controller

Forget about stacks of remotes for your TV, blinds, garage door, air conditioning, or lighting. Avatto S16 Pro is a universal remote control that will replace all others, providing you with convenience and space saving. It guarantees fast and precise communication with equipment via infrared at a distance of up to 10 meters. What's more, it supports the dedicated TUYA/ Smart Life app, so you can control your devices remotely using your phone or tablet. The remote control is distinguished by its robust design and handles great in almost any conditions!

Compatible with a wide range of devices

Avatto S16 Pro supports both RF433 and RF315 frequencies, which means it is compatible with most devices on the market. The expanded IR code library covers more than 5000+ IR devices, such as TVs, air conditioners, set-top boxes, fans and lights. About 98% of remote control devices on the market work with 433 and 315 MHz protocol, so S16 Pro is an indispensable tool for smart home control. With S16 Pro you save space and gain the convenience of controlling various devices with one controller!

Smart home - Alexa, turn off the lights

The remote control supports 2.4 GHz Wi-Fi connectivity, which allows you to remotely control your devices with your smartphone or tablet. Once connected to the app, you can use smart assistants such as Amazon Echo Alexa or Google Home and control the appliances in your home with simple voice commands. This is an extremely convenient solution that frees you from having to use a remote control or other controller. Avatto S16 Pro is a convenient, future-proof solution that allows you to manage your smart home easily and intuitively.

Versatile control with stable signal

The Avatto S16 Pro offers an infrared range of up to 10 meters, allowing you to control your devices even from the farther end of the room. Equipped with omni-directional infrared transmitters, it provides a stable signal and fast response. This means greater convenience and flexibility in controlling devices in your home.

Robust design

The device operates over a wide temperature range (0°C to 60°C) and can handle high humidity, making it great for a variety of conditions. As a result, you can be sure that the Avatto S16 Pro will work smoothly no matter where you need it.

Share access

The remote control allows easy operation by other family members as well. In the mobile app, you can allow other household members access to manage their devices. By opting for Avatto S16 Pro, you will make your home, even more functional and friendly for all its inhabitants. Bring innovation into your life and indulge in the convenience that smart technology offers.
