

Green Cell Adapter GC HUB2 USB-C 6in1 (USB 3.0 HDMI Ethernet

Green Cell Adapter GC HUB2 USB-C 6in1 (USB 3.0 HDMI Ethernet

Ref: 5903317224587

Green Cell Adapter GC HUB2 USB-C 6in1 (USB 3.0 HDMI Ethernet USB-C)

The Green Cell adapter will allow you to turn one USB-C port into six additional ports. This will significantly increase the range of possibilities of your device and make your work more efficient. What's more, it stands out with its modern and elegant design.

Faster and more convenient charging

Thanks to Power Delivery and Pass-Through technology, connected devices can be powered with maximum power directly via the adapter. In addition, the GC HUB2 allows support for other fast charging technologies including Quick Charge 3.0/4.0.

High compatibility

The GC HUB2 adapter is compatible with any device equipped with a USB Type C port, allowing you to get more efficiency and convenience from your work. It will work with the latest tablets and ultrabooks such as Apple Macbook Air 2018, Macbook Pro 2016/2017/2018/2019, iPad Pro 2018/2020/2021, iPad mini 2021, iPad Air 2022, Dell XPS 13/15, Huawei MateBook X Pro, Lenovo X1 Carbon, Asus ZenBook 3, Microsoft Surface Book 2/3. Please note: After updating your MacBook to the latest macOS 12.0.1 Monterey software version, you may experience problems with the adapter. Subsequent Apple hardware updates should resolve this issue.

Sleek, modern design

The adapter fits perfectly with the technological needs and presence of mobile devices. The shape of the GC HUB2 makes it extremely stable on any surface. The white backlighting adds style and emphasises the futuristic look. The nylon braided cable further guarantees the reliability of the device.

Ethernet connection for the discerning

With the GC HUB2 adapter, you don't have to be limited to a Wi-Fi signal. With an additional 1 Gbps Ethernet connection and a built-in network card, you can enjoy fast data transfer and a stable internet connection.

More possibilities

The GC HUB2 allows you to make wider use of your smartphone's capabilities. Models equipped with Samsung DeX technology, Huawei EMUI Desktop or PC mode become a mini computer when connected to the hub. The GC HUB2 fully replaces the functionality of the Nintendo Station. Plug your Nintendo Switch console into the adapter and take your entertainment to the next level.

Perfection in every detail

With the hub, you can stream 4K video with ease. Connect an additional monitor or projector to make the most of your computer or smartphone in the best picture quality. Alternate Mode support via the USB-C port is required for proper image transfer.

Always at your fingertips

In a small, compact casing lies a wealth of great technological possibilities. The GC HUB2 will be the perfect companion for the mobile extras you use every day. More efficient and convenient work and entertainment are at your fingertips.
