Deerma F628S - Humidifying the air enters a new level

Deerma F628S is a functional new generation humidifier. Elegant, easy to use and humidifying with deeply purified water, it will help you take care of your and your family's health.

Designed for optimal performance

Reliable and health-safe operation of the humidifier is guaranteed by its clever design. Water entering the tank is routed through an integrated, unidirectional channel straight into the UV light-exposed portion of the unit, which provides 360° purification. The water is then directed to the atomizer - releasing a clean, fresh mist that will ensure that the air in your home is properly humidified and great for your health. See for yourself how much good such a simple device can do!

The magic of UV

To provide you and your family with a healthy, properly sterile environment, the humidifier uses UV light purification, which gives amazing results. It avoids chemical contaminants and harmful side effects. Deerma F628S takes care of your safety - you will feel the positive effects of properly humidified air faster than you think!

Humidity level tailored to you

Deerma F628S will take excellent care of your health. Human self-esteem is closely related to the temperature and level of air humidity - so it is worth ensuring optimal conditions. Deerma F628S humidifier can guarantee a constant humidification of the air that stays between 45% and 90%, which is comfortable for the human body. Set the level of humidification that makes you feel best - Deerma will stop the automatic misting when the selected value is reached. This makes it possible to prevent over-humidification.

#### Banally simple operation

The user-friendly interface makes operating the Deerma F628S humidifier simple and pleasant. The device has a built-in hygrometer, thanks to which the digital display will indicate the level of air humidification. In addition, you can check the room temperature with just a glance. With the help of a few intuitive buttons, you will also set the optimal mode of the device for your lifestyle. Deerma F628S will allow you to easily and conveniently ensure comfortable and health-friendly room humidification levels in your home.

#### Enjoy humidified air around the clock

Deerma F628S will serve you seamlessly both day and night. Just turn off the display before you go to bed, and you'll be able to enjoy a healthy, restful sleep that won't be disturbed by unnecessary light. Nor will you be disturbed by any sound. The humidifier works extremely quietly - the noise level is only 30 dB in its case. So you can peacefully sleep, study, work and rest - all in a properly humidified environment.

#### Set an optimal schedule

The Deerma F628S humidifier gives you even more options! You can set a customized humidification schedule for it, tailored to your needs and schedule, for as much as 12 hours ahead. You don't have to set it anew each time - this solution will save you valuable time. What's more, after the set time, the humidifier will automatically stop spraying water mist - so don't worry if you forget to turn it off!

#### Decide how much water to spray

With Deerma F628S you also have the option to adjust the amount of water sprayed to your needs and preferences. You can choose from three levels - from low to medium to high. You can make the choice with just one button! Find out the amount of mist that best meets your needs and adjust it according to the situation. Don't be afraid to experiment - discover your preferences and enjoy perfectly humidified air.

#### Stylish and practical design

The design of the Deerma F628S humidifier is both aesthetically pleasing and practical. Despite its relatively small size, the device is distinguished by its impressive capacity - it is as much as 5 liters and is enough for a whole day of work. So you only need to change the water once a day! Its level can be monitored in real time - this is made possible by a simple, transparent indicator. Deerma F628S is a simple, low-maintenance device that will delight you with its effective performance.

#### Take care of your skin

Did you know that Deerma F628S will also help you take care of your complexion? The device produces aqueous microparticles that deeply moisturize your skin pores. The humidifier will benefit not only your health, but also your appearance!

#### Humidifier and aromatherapy in one? With Deerma F628S it is possible!

It doesn't take much to turn the Deerma F628S humidifier into an aromaterizer. Just pour your favorite essential oil into a special container. Then turn on the device and enjoy the beautiful, relaxing scent! It's the perfect way to relax after a long, tiring day.
