

## Wireless vertical mouse Havit MS550GT 800-1600 DPI (black)

Ref: 6939119019419

Wireless vertical mouse Havit MS550GT 800-1600 DPI (black)

### Ergonomic mouse

The MS550GT wireless mouse with vertical orientation is designed for comfortable use. Combined with incredible speed, it allows you to work efficiently and comfortably.

### Individual speed

Customizing the mouse to your needs is extremely easy - the sensitivity adjustment button is located on the device and allows you to choose from three resolution levels: 800, 1200 or 1600 DPI.

### Reliable connection

The 2.4 GHZ wireless technology allows for stable use without worrying about connection interruptions. In addition, the connection to the computer is resistant to any interference within a range of 10 meters, which allows for uninterrupted operation in any environment.

### Comfortable

The ergonomic shape is the biggest advantage of the MS550GT. The vertical position of the mouse allows a comfortable and natural hand position, and thus eliminates wrist fatigue during prolonged work. Using this type of mouse on a daily basis allows to avoid unpleasant health consequences associated with too long work with a computer, such as carpal tunnel.

### Easy web surfing

The mouse is equipped with additional buttons that make surfing the web easier. Placed close to your fingers they allow you to quickly switch between tabs or pages, but also to use zoom in and out functions.
