Remax RM-533a headphones, USB-C, 1.2m (white)

The Remax RM-533a are stylish and comfortable headphones with a USB-C connector for compatibility with many devices. The comfortable cable length ensures free movement while listening to your favorite tunes, while their ergonomic design and soft silicone tips will ensure full listening comfort. The headphones feature a remote control and built-in microphone, so you get easy access to control music and calls, as well as the ability to make phone calls, without having to take out your smartphone!

Clear sound

The headphones feature an impedance of 16Ω, which means they are designed for use with portable devices such as smartphones, tablets and MP3 players. The high sensitivity and low impedance allow the headphones to achieve the right volume level with a small amount of power, so they will also work well in noisy environments. The Remax RM-533a feature a lively and dynamic sound, with well-defined lows and precise mids and highs.

Manage music and talk comfortably

The headphones have a built-in remote control, providing convenient control of music and phone calls without having to take your phone out of your pocket. What's more, the built-in microphone ensures unobstructed phone calls. The device is fully compatible with iOS.

Designed with comfort in mind

The RM-533a provide a comfortable and ergonomic fit to the shape of the ear. The headphones' lightweight design allows you to wear them seamlessly for long periods of time without feeling uncomfortable. The comfortable fit also prevents the headphones from falling out of your ears during physical activity, so you can listen to your favorite tunes whenever you feel like it!
