

Lint remover Deerma MQ813W

Lint remover Deerma MQ813W

Ref: 6955578034343

Take care of your clothes

With the help of the Deerma multifunctional clothes' shaver, you can easily get your wrinkly coat, sweater or blouse back in order. Its easy to load and compact size makes it comfortable to use wherever you are. With a 7000 rpm engine and a reliable triple blade, your clothes will look like new very soon.

Forget about the troublesome hair

The shaver is remarkably compact and practical in design. In order to increase its functionality and at the same time allow for significant space saving, an adhesive roller is placed in its handle. If you have a dog or cat at home, you don't have to worry that its hard to remove coat will stain your clothes - you will easily remove it and look great again.

Stunning performance

The large shaving head is responsible for the incredibly efficient operation of the device. What's more, when the blades are rotating, a suction vacuum is generated which draws in the cut-off waste. This allows the shaver to effectively dispose of the waste from the material surface at lightning speed.

Quick and convenient charging

You can conveniently charge your shaver via USB cable with a regular charger or powerbank. Only 2 hours of charging is enough for you to use it for up to 45 minutes. Thanks to that you can take care of a really large number of clothes at once.

Just press the button

Operating the shaver is extremely simple. This is made possible by a large, convenient button, which ensures quick response and reliable operation. The product is also equipped with a small LED that indicates when it is charging. Thanks to that you always know what is happening with your device.

Durability and safety

The device is made of durable materials. The highest quality blades effectively cut down the moss. At the same time, the shaver provides complete safety. Honeycomb-like protective mesh protects you from injury and your clothes from accidental damage.

Comfort of use at home and on the go

The shaver is light and handy, which makes its use extremely comfortable. It will not take up too much space in your home, so using it will not be a nuisance. You can also easily fit it into your suitcase or backpack and take it with you on a journey - unaesthetically wrinkled clothes will never spoil your business trip or vacation.
