Earphones Soundpeats Capsule3 PRO (Black)

The Soundpeats Capsule 3 Pro headphones provide high quality sound certified by HiRes Audio. What's more, they eliminate ambient noise and allow you to talk freely on the phone. They offer 2 modes of operation, and a dedicated app allows you to customize their operation. In addition, they work for about 8 h on a single charge, and the charging case provides a total of 52 h of playback. You'll also find overlays in 3 sizes, so everyone can choose the right one for themselves.

High quality sound

Now you'll hear previously unseen details of your favorite songs. The headphones provide HiRes Audio and use the LDAC audio codec. They are also equipped with 12-millimeter drivers, which translates into ear-pleasing treble and midrange tones and deep bass.

Effective noise cancellation

Don't worry about ambient noise - the use of hybrid ANC technology effectively eliminates outside sound up to 43 dB. So you can focus on what's important. What's more, the Soundpeats Capsule 3 Pro lets you talk freely on the phone, even in noisy places. The headphones are equipped with 6 microphones that reduce noise and wind gusts. Now you will be sure that your caller can hear you.

Transparency and Game modes

Customize the operation of the headphones to suit your needs. From within the app, you can turn on Transparency mode, which allows you to stay in touch with your surroundings. It will work well in places like a train or bus station - you'll easily hear important announcements. Game mode, on the other hand, offers a delay of 70 ms for better synchronization of audio and video.

Dedicated app

Personalize the Capsule 3 Pro's operation even further to suit your needs. Just download the Soundpeats app and pair your smartphone with the headphones. With it you can adjust the equalizer, set the volume, reset the settings and change the mode. There are also such functions as disabling the touch panel, updating the software and information on the battery level.
