Electric Heated Eyelash Curler ANLAN 04-AJMJ14-001 (white)

Electric eyelash curler ANLAN 04-AJMJ14-001 (white)

Are you dreaming of long, curled eyelashes? Anlan's electric eyelash curler will transform your look for a long time! Forget about expensive treatments! The device offers 2 temperature levels suitable for both weaker and thicker hair. It curls eyelashes at the root, providing a lift and curl effect for 24 hours. The lash curler is easy to use, with a single charge for up to 60 days of use. Several safety features make using it risk-free. It's lightweight, handy and easy to clean, and you'll be able to replenish its energy using the USB-C cable you'll find in the kit. Make friends with Anlan and endow everyone with a flirtatious look!

Instant heating

With the use of heat, you'll quickly get the effect of a captivating look. The lighter offers 2 levels of heating - the lower temperature (50°C) will work great with weaker and thinner hair. The second stage (60°C) effectively curls thicker, more difficult to style hair. It only takes 10 seconds for it to be fully ready for use - you won't have any doubts, because when the device reaches the right temperature, the silicone roller will turn from dark pink to light.

Eyelashes curled at the root

The silicone roller is designed to adhere even better to the lash line. This allows the eyelash curler to evenly grip the hairs at the root, providing a spreading lash fan effect. Curl them, then color them and impress with a sensual look.

Created with convenience in mind

The ergonomic design makes the eyelash curler extremely comfortable to use and is ideal even for novice users. It's easy to clean, so it's sure to last you even longer! The eyeliner is lightweight and handy - it will fit in your makeup bag, so you will surely take it on more than one trip!

Efficient and safe

Anlan's lure is equipped with a powerful battery, whose capacity is as much as 400 mAh. A single charge allows up to 60 days of work. Its energy will be replenished with the USB-C cable, which you will find in the set. The device is equipped with an NTC temperature control system and a smart sensor, thanks to which the hairdresser automatically shuts off after 5 minutes. Anlan is a guarantee of safety!

Included
