

3-slot pocket charger box Telesin + 2 batteries for GoPro He

Ref: 6974944461255

3-slot pocket charger box Telesin + 2 batteries for GoPro He

Telesin three-channel charger + 2 batteries for GoPro Hero 11 / Hero 10 / Hero 9 (GP-PT-G01)

The three-channel charger from Telesin allows you to store and renew the power of up to 3 GoPro Hero 11, Hero 10 and Hero 9 batteries. The USB-C port offers up to 15 watts of power, and LED indicators will let you know the charging status. Now you can charge your batteries on the go and outdoors - without worrying about losing power while recording your most important moments. What's more, thanks to its clever design, the device is extremely handy and provides space for 2 TF cards. The kit comes with 2 rechargeable batteries.

Fast charging of the batteries

The Telesin charger allows you to renew the energy of three batteries in just 2.5 hours, saving you precious time. Verifying the charge level is extremely easy - just open the charger's cover to check the status of the LED indicators. So you can conveniently schedule your recordings without worrying about insufficient power. In addition, the product features a side USB-C charging port.

Record videos without any interruptions

Thanks to its excellent performance, the included batteries achieve 96% longer life than standard batteries, even in 4K/120FPS mode. This means you can enjoy longer recording sessions - whether you're capturing exciting adventures on the go or creating professional videos, Telesin lets you capture unforgettable moments for a long time. What's more, the batteries are rated for low temperatures

(-20°C), allowing you to film winter sports, interesting landscapes and much more!

Safety guarantee

Telesin takes care of your safety. Reliable overcharge protection prevents damage to the batteries, eliminating the risk of overheating and extending their life. In addition, the over-discharge protection system and short-circuit protection increase protection during charging. The product is certified according to many standards, such as CE, RoHS, FC, UL and UN38.3. In addition, it is made of durable ABS material and is resistant to damage and dust.

Practical design

What sets the Telesin charger apart is its unique case-like design. This makes the device extremely practical and its transportation hassle-free - you can conveniently stow it in your bag or even pocket. In addition, the charger offers space for 2 TF memory cards. As a result, the Telesin product is not only functional when charging batteries, but also allows you to conveniently store your accessories. It's the perfect solution for travelers and active filmmakers who value order and mobility.
