EKSA E7000 gaming headphones

EKSA E7000 gaming headphones feature an ergonomic design with an original werewolf motif and LED backlighting. Comfortable, soft earcups allow long-lasting use, and the adjustable microphone with noise-canceling function eliminates unnecessary noise, ensuring that you can communicate comfortably during games. The 50mm drivers provide high-end sound, and the stereo bass sound further enhances the listening experience.

Immersive experience

Delight in clear sound and hear even more from EKSA. With advanced audio decoding technology, you can experience clearer and more precise sound, transporting you deep into the action and feeling like the hero of your favorite game. Spatial localization technology makes every step, shot and engine sound come to life, providing a unique sense of immersion. Meanwhile, the use of high-quality 50mm drivers has resulted in a phenomenal listening experience.

Noise-canceling microphone

The E7000 features a cardioid microphone that swivels 120° - so you can easily adjust its position to suit your current needs. Thanks to the noise cancellation function, it effectively suppresses up to 95% of background noise, ensuring clear and crisp conversations during gameplay. As a result, unnecessary noise won't distract you and you'll be fully focused on the game.

Wide compatibility

Whether you play games on a desktop computer, laptop, PS4/PS5, Xbox or Switch, EKSA's headphones will work perfectly in any situation. Simply connect them to the device of your choice with a 3.5mm jack cable and start playing. Forget about having to install additional drivers.

Ergonomic design

EKSA headphones are designed for maximum comfort. The large and soft 25 mm thick ear cups fit perfectly over the ears without causing pressure. The ergonomic design tilts at 4.3° for a perfect fit to the shape of your head, and the headband allows 3 cm of adjustment, so you can tailor the E7000 to your preferences.

Original design and LED backlighting

With a unique werewolf motif and striking green LED backlighting, the headphones combine stylish elements with functionality to provide you with an immersive gaming experience. To enjoy the futuristic design that the backlighting provides, simply use the USB cable.
