

Tempered Glass Film 5.5" Sunnlylife for DJI RC controller (M2)

Ref: 5905316147270

Tempered Glass Film 5.5" Sunnlylife for DJI RC controller (M2)

Sunnlylife 5.5" tempered glass for DJI RC controller (M2-GHM9172)

This indispensable accessory will effectively protect your controller's screen from any scratches or cracks, while maintaining its smooth touch response. The glass features a 9H hardness rating, is highly transparent, and the 2.5D rounded finish makes the delicate edges of the screen even better protected. In addition, it provides excellent smoothness of screen operation. Sunnlylife glass is equipped with an oleophobic coating, which will help you keep your screen clean.

Natural image coloring

The glass, despite its high degree of protection, is highly transparent, which means that it does not interfere with the quality of the displayed image. Using the controller, you will always see a High Definition image with clean and natural colors.

Perfect fit

Sunnlylife's 5.5" tempered glass is designed specifically for DJI RC's PRO/M300RTK/MAVIC 2/T20 series, so it fits perfectly against the screen for comprehensive protection. The 2.5D finish makes the particularly vulnerable edges completely safe! Installation of the glass will not cause you any problem.

Robust protection without contamination

The hardness grade of 9H provides effective protection against any cracks and scratches, so you can use your equipment without worrying about damage. What's more, the additional oleophobic coating will protect the screen from unwanted fingerprints and greasy stains, making it even easier to keep clean!
