TWS QCY HT07 ANC Headphones (black)

Are you looking for comfortable headphones that meet your requirements? How about the QCY HT07? This wireless model provides long operating time, excellent audio quality, as well as exceptional quality phone calls. Equipped with ENC noise-canceling microphones and 4 ANC noise cancellation modes, it will allow you to cut yourself off from the outside world. Low latency will also please many a gamer! Check out what else they have to offer!

Fantastic sound

10-millimeter dynamic bi-fim drivers are responsible for the high audio quality. They provide precise sound reproduction, as well as perfectly balanced bass, midrange and treble. What's more, the HT07 will be great if you often listen to podcasts, audiobooks or make phone calls - the sound of vocals is clear, crisp and detailed.

4 noise cancellation modes

HT07 headphones will adapt to you! ANC noise cancellation will let you disconnect from the outside world and focus solely on the music or podcasts you're listening to! At your disposal are up to 4 modes tailored to your needs. Indoor mode effectively eliminates noises such as conversations, loud TV, etc. In Commuting and Outdoor modes, you'll forget you're in a noisy train station or a bustling street. Anti-wind mode will reduce annoying wind noise to a minimum, for example, while running.

Reliable Bluetooth connection

Bluetooth version 5.2 is responsible for the wireless operation, guaranteeing stable transmission without interference over a distance of up to 10 meters! The latency level is only 0.08 seconds, which means you will enjoy perfect synchronization of sound and picture! Play dynamic games and break more records!

Talk freely

HT07 is a model that uses an intelligent algorithm to make your phone calls go smoothly! The headphones are equipped with 6 ENC noise-canceling microphones that accurately capture your voice while effectively reducing outside noises. Do you conduct online broadcasts? Or do you often talk on the phone? Your interlocutors will now always hear clearly everything you have to say to them!

Workout to your favorite rhythm

The headphones keep up with even the most active users! They are IPX8 rated, which means they are not afraid of drops of sweat or rain, so you can take them to the toughest workout with no worries. Don't give up running even in a downpour? Great! The headphones can accompany you even then!

Long working time

Can't imagine traveling without music? Neither can we! That's why the headphones are equipped with a powerful battery that allows up to 32 hours of wireless operation! Depending on the mode you choose, you can use them for about 4 hours talking on the phone or about 7-8 hours listening to your favorite tunes. The charging case will allow you to replenish the energy of the headphones 3 times.

More possibilities with the app

Using the QCY app, you can personalize the performance of your headphones. What are the possibilities? From it, you will adjust the EQ values, sound balance, and set the operation of the touch panel according to your preferences. The app works with Android and iOS, offering wide compatibility.

Full comfort of use

The advantages don't end there! A single handset weighs only 4.4 g, so even prolonged use will not cause discomfort. What's more, the sound holes are connected to ensure air pressure balance. What does this mean? Exceptional comfort and fantastic sound!
