TWS QCY T22 Crossky Link Headphones (black)

Discover the comfort offered by QCY's open design headphones. Directional audio and a biomembrane with a large vibration area provide fantastic sound quality, while a dual ENC noise-canceling microphone is responsible for high-quality phone calls. The T22 offers up to 10 hours of playback, and 10 minutes in the charging case will allow for another 3 hours of listening. The headphones feature an IPX6 waterproof rating.

Open design with directional audio

The QCY T22 headphones will open up a whole new dimension of musical experience for you. Thanks to the open design, they do not cause unpleasant pressure - instead of in the ear canal, you wear them in the ear cup. Such a solution provides unparalleled comfort even during long hours of use. What's more, the directional audio guarantees precise sound transmission directly to your ear, while allowing you to stay in touch with outside sounds.

Tailored to your needs

Thanks to the thoughtful design, you can use the headphones under any circumstances! The lightweight design and the cable that connects the headphones runs to the back of your head, making them perfectly balanced, holding on better, so you can listen to music freely even during the most dynamic workouts! What's more, the protection of the headphones is IPX6 and they are not afraid of drops of

sweat or rain!

Amazing bass power

And what about the sound? Thanks to the enlarged diaphragm area, T22 Crossky Link provide even deeper, dynamic sound full of sonic details. But that's not all! The headphones are equipped with an additional woofer horn, which means the bass will give you goosebumps! Listen to your favorite tunes like never before!

Fast charging

Your headphones will give you up to 10 hours of listening, while in standby mode they will last up to 6 days! What's more, if you realize at the last minute that the T22s are discharged, you won't have to wait long for them to be ready for use! Just 10 minutes of charging and you'll gain another 3 hours of musical experience.

Talk freely

With QCY, all phone calls will be clear! The headphones feature dual microphones with ENC noise cancellation. What this means. Your interlocutor will hear your every word clearly, not the surrounding sounds. Talk freely even on a crowded bus!

A treat for gamers

If you play mobile games or watch movies on your phone, you'll love how low latency the T22 Crossky Link stands out. With a latency of 0.07 seconds, you'll be able to enjoy perfect audio and video synchronization.

Comfortable operation

The headphones were created with comfort in mind, which is why they are equipped with a touch panel that will allow you to manage music and calls. All you have to do is tap the appropriate headphone. The T22s also don't require additional steps when you want to connect them to the device of your choice - they're ready to go as soon as you turn them on! In addition, in the dedicated app you can adjust the EQ values and personalize the performance of your headphones.
