Fast Charger McDodo CH-3773 20W GaN (purple)

McDodo CH-3773 20W GaN mains charger (purple).

Now charging is faster than you think! The McDodo network charger offers fast charging with up to 20 watts of power, so you'll renew your smartphone's energy in no time. It is compatible with iPhones 6-14 and iPads. Thanks to a number of safety features and GaN technology, it provides a high level of security.

Fast charging

You no longer have to wait indefinitely for your smartphone to be ready to use! The McDodo charger supports PD 20W fast charging. Thanks to this you will renew up to 60% of energy in just 30 minutes. You can successfully charge your iPhone 6-14 series, as well as your iPad with it.

For the sake of safety

Are you worried about damaging your device while charging? Don't be! Multi-level protection reliably protects against overcurrent, short-circuits, overvoltage, overcharging or electrostatic discharge. You also don't have to worry about your smartphone overheating - all thanks to the dual heat dissipation structure and developed temperature control technology! What's more, once your device is charged to 80%, the charger automatically switches to Low-Current mode to protect your phone from overcharging.

Innovative GaN technology

Get ready for even faster and more efficient charging! The McDodo mains charger uses advanced GaN, or gallium nitride, technology to make charging faster, more efficient and safer than ever before. Thanks to the use of GaN, the charger is not only smaller and lighter, but also generates less heat, resulting in longer device life. Now you can enjoy convenience and mobility without sacrificing fast charging.

The perfect combination of functionality and design

The charger's lightweight and compact design means you can take it with you anywhere. It's compatible with a wide voltage range of 110-240V, so you can use it whether you're traveling domestically or internationally. And that's not all - the McDodo mains charger also features a modern and stylish design that is sure to attract the attention of many users.
