TWS EarFun AirLite Headphones (black)

Enjoy superior sound quality and clear phone calls anywhere. The TWS EarFun AirLite wireless headphones feature a lightweight, ergonomic design and are equipped with 13mm drivers to deliver Hi-Fi surround sound. The 4 noise-canceling microphones allow you to communicate freely, while Bluetooth 5.3 technology ensures reliable transmission. The charging case allows you to extend the equipment's operating time up to 30 hours and offers a digital display that indicates the charge level.

Hi-Fi quality sound

Discover stereo sound of the highest quality. The EarFun AirLite features 13-millimeter composite drivers that deliver powerful bass and crystal clear treble. In addition, the headphones use DSR technology and guarantee lossless HD audio rendering. Now you can completely immerse yourself in your favorite music while appreciating the richness of detail.

4 microphones and ENC function

Thanks to the enhanced 4-microphone system with ENC function, you can enjoy improved phone call quality. This advanced technology eliminates unwanted background noise for clear and crisp communication. EarFun AirLite headphones also support SBC and AAC codecs, which translates into excellent sound quality for both listening to music and talking on the phone.

Bluetooth 5.3

Let connection problems become a thing of the past. The headphones use the latest Bluetooth 5.3 technology, and with dual-channel transmission you can enjoy stable sound without interference. Minimal power consumption allows you to extend the equipment's operating time, and low latency is sure to be appreciated by gaming enthusiasts. What's more, after the first pairing, the headphones will automatically connect to your device as soon as you open the case. Experience how convenient it is!

Wide compatibility

EarFun headphones are compatible with devices running on iOS and Android. You can successfully pair them with laptops, tablets and smartphones. Enjoy your favorite music, freely make calls and watch movies without any restrictions!

Digital display and long battery life

The digital display allows you to monitor the charge level of each headphone and case. This way you can be sure that the equipment will not unexpectedly discharge at an inopportune moment. Now your favorite songs can accompany you at any time! One charge is enough to keep the headphones running for 5 hours. The charging case allows you to extend this time to 30 hours. The battery level is low and you need to leave the house? No problem - 10 minutes of energy renewal is enough to delight in music for another 2 hours.

Intuitive operation

Operating the EarFun AirLite headphones is simple and intuitive. Touch panels provide convenient access to various functions - just tap the appropriate earphone. Now you can freely answer incoming calls, scroll and change songs, pause or resume playback, and adjust the volume. Forget about having to reach for your phone and enjoy the comfort of your dreams!

Lightweight design and IPX7 water resistance

EarFun AirLite headphones are distinguished by their lightweight design - one earphone weighs less than 4g. This allows you to enjoy comfortable use for a long time. Also noteworthy is the IPX7 level water resistance. The equipment is resistant to splashes or sweat and can accompany you during an intense workout.
