

USB-C Charging Cable Lightning MFi Green Cell KABGC07 for Ap

Ref: 5903317227762

USB-C Charging Cable Lightning MFi Green Cell KABGC07 for Ap

Green Cell KABGC07 USB-C Lightning MFi cable for Apple iPhone, Power Delivery, 1m.

Green Cell cable allows you to directly charge and sync your iPhone with the latest MacBooks/iPads (USB Type C) and up to 2.5x faster PD charging. It comes with official Apple MFi certification and a C94 chip, ensuring perfect performance with all compatible Apple devices. The GC Power Stream's unparalleled durability is the result of: an extremely abrasion-resistant braided sleeve, metal shields that effectively protect both plugs from breakage, and multi-stage Kevlar fiber cable protection.

Fast charging

The GC Power Stream cable allows you to instantly charge iPhone 11 / 12 / 13 / 14 Pro Max / Pro / Max / Mini / XS Max / XS / X / SE and iPad Pro 12.9 (1st Gen and 2nd Gen) / Pro 10.5 devices equipped with a Lightning connector. Simply connect the cable to a USB-C power adapter from 18W to 87W to enjoy up to 2.5x faster charging for your devices.

The connection that simplifies everything

By incorporating Lightning and USB-C connectors into a single cable, the way has been opened for the first time to directly connect iPhone smartphones to tablets and ultrabooks equipped with a USB Type C port. This allows you to connect your iPhone to your iPad, and MacBook, which not only allows you to charge your smartphone, but also to freely sync data between devices. Forget about adapters!

Unmatched durability

The braid of the GC Power Stream cable is made of durable polypropylene, which makes it extremely effective in protecting it from mechanical damage and abrasion. In addition, the use of Kevlar threads running along the cables prevents it from breaking. Laser-welded, metal plug covers protect the connectors from accidental breakage, and a multi-stage wire guard ensures that the cable functions perfectly without any interference.

Many possibilities

The Green Cell Power Stream cable allows high-speed transfer and synchronization of data between devices at 480Mbps which equals 150 photos transferred in just 5 seconds! The accessory also comes with an official certification and Apple MFi chip, which is a guarantee of quality and perfect operation with any compatible Apple-branded device.
