Smart Food Dispenser with 360° HD Camera HHOLove O Sitter Wi

Intelligent food dispenser with 360° HD camera HHOLove O Sitter Wi-Fi

Take care of your pet's healthy eating habits. HHOLove O Sitter is a smart food dispenser that allows you to customize your pet's diet. You can choose from available feeding plans or create one yourself. Control is facilitated by a dedicated app, and an HD camera allows you to monitor your cat in your absence. In addition, two-way audio allows you to give commands to your pet. What's more, light indicators will provide you with information on the device's working status, and you can create a cat house out of the product packaging. Check out what else O Sitter offers!

### Built-in camera

Stay in touch with your pet no matter where you are. The dispenser offers a camera with 4x zoom. It provides HD quality images, and its range is 360° horizontally, 110° vertically. In addition, AI technology allows you to automatically track your moving pet. So you can watch it from anywhere - a WiFi connection allows it. What's more, the camera uses 3 modes: IR Night Vision, Privacy and Do Not Disturb.

### Convenient control with the app

Operating the O Sitter won't be a problem for you - using the smart dispenser is made easy with a dedicated app. From within the app, you can not only control your pet, but also save a 60-second video showing what your pet has been up to while you were away. In addition, two-way audio allows you to give him commands, and the built-in laser acts as a toy and will keep your cat entertained.

#### Feeding schedule

The app also allows you to customize your cat's diet. The available options will help take care of proper eating habits during your pet's pregnancy, make it easier to lose weight or maintain it. You can also adjust the settings yourself, choosing the size and number of portions and the time of serving them.

#### Carefully considered design

The smart dispenser is designed for feed sizes ranging from 3 - 13 mm, and the capacity of the container is 2.5 liters, so the food will last longer. The bowl, on the other hand, was created from 304 stainless steel and you can easily keep it clean - you can wash it under running water. For the sake of your pet's health, it is recommended to clean the bowl once a month.

#### Additional capabilities

The light indicators located on the top of the device will provide you with information regarding its operation status. With their help you will learn about the network connection, software updates, connection problems, the need to refill the tank, etc. In addition, the O Sitter package can be used as a cat house - special snaps are included to allow its installation.
