Ref: 6976037360988

Smart Thermostat Radiator Valve Avatto TRV10 Zigbee Tuya

Avatto TRV10 Zigbee Tuya smart thermostatic head

Do you want your home to always have a pleasant temperature? That's why you're looking for a smart device that will help you do that? The Avatto smart thermostatic head will be the perfect choice! It is distinguished by its compact size, and what's more, it has been equipped with many useful functions that make its operation very easy. What's more, with the help of a dedicated app you will be able to manage them from anywhere and at any time. See what Avatto can offer you!

Thoughtful design

What distinguishes the Avatto smart thermostatic head is its well-thought-out design. Its dimensions are only 59.4 × 99.3 × 59.4 mm, which makes it very compact and will fit into any interior. What's more, the displayed data can be rotated at will so that you can always read it comfortably. You can also adjust their brightness. Auto/manual/off/on modes are also at your disposal. What's more, the device is powered by 3 AA batteries, so you won't have to worry about buying and replacing them. You'll also find various adapters included, making the Avatto device compatible with different heaters.

Easy control

The Avatto smart thermostatic head also means easy control. All you have to do is download the Smart Life or Tuya app to your phone, and you will gain the ability to control the device from anywhere and at any time. What's more, when you combine it with a smart

gateway (available for sale separately), you gain voice control with assistants such as Amazon Alexa and Google Home. The app gives you the ability to program weekly schedules. This allows you to plan what the temperature should be for 7 days at 4 different times. It also records temperature history and displays it as a curve. In addition, you can share control with your family.

Safe use
When you choose the Avatto device, you don't have to worry about your and your family's safety. You'll find a lock function in the app so that your child won't be able to control the head, so you can be sure that they are properly protected. What's more, the smart head is programmed by default to turn on and off at a certain temperature and time, so your pipes won't freeze and calcify in daily use.

Additional features
The Avatto smart thermostatic head is equipped with a number of features to make its use even more convenient. Thanks to its temperature calibration function, it will accurately detect and display the temperature so that you always know how many degrees are in the room. It has also been equipped with an open window detector. When the temperature in the room drops by 1.5 degrees in 5 minutes, the device closes the valve, resulting in the heating stopping. It will turn on again when the room temperature rises by 1.5 degrees in 4.5 minutes, or after 30 minutes without any operation in the app, or on the device.

More capabilities
The Avatto device also has a linkage function. What does this mean? It gives you the ability to create various smart automations to trigger scenes. What's more, a group control function is also at your disposal. You can control several appliances, located in different rooms, at the same time. Discover what user comfort you will gain with Avatto!
