

Set transmitter FlySky GT5 + receiver BS6

Set transmitter FlySky GT5 + receiver BS6

Ref: 5905316147508

FlySky GT5 advanced transmitter and BS6 receiver

The FlySky GT5 transmitter is an advanced device designed for modeling enthusiasts, offering a wide range of functions and capabilities. Equipped with AFHDS 2A technology, the GT5 transmitter provides reliable connection and precise communication. With six channels at its disposal, the GT5 allows full control over various aspects of your model.

Precise control and mobility

A unique feature of the GT5 transmitter is the steering wheel equipped with a bearing, which ensures smooth and precise control. In addition, the foldable antenna allows the transmitter to be conveniently carried and minimizes the risk of damage during transportation.

Special modes for Crawler cars

GT5 also features advanced modes explicitly designed for Crawler cars. SVC (Steering, Throttle, and V channel Control) functionality and haptic feedback guarantee even more control over the off-road vehicle. The ability to run on both battery (AA) and rechargeable lithium-polymer (2S) batteries provides convenience and flexibility in operation.

Perfectly matched BS6 receiver"

The BS6 receiver, which is part of the kit, is perfectly matched to the GT5 transmitter. It uses AFHDS 2A technology, which allows for a

seamless and reliable connection. Featuring 6 PWM channels, the receiver allows a wide range of configuration and control over the device.

Enhanced control with the BS6 receiver

The BS6 receiver's range of 100 to 300 meters on the ground provides freedom and confidence. An integrated single antenna with a range of 180 meters further enhances signal quality. The receiver operates in a voltage range of 4.0V to 6.5V, ensuring compatibility with various power sources. With RSSI (Received Signal Strength Indicator) support, the user has a constant view of the connection quality, which translates into safety and reliability. The PWM data port allows easy connection to various devices.

Resistance to conditions and quality certifications

The BS6 receiver also features exceptional weather resistance, allowing it to operate in temperatures from -10 °C to + 60 °C and humidity from 20% to 95%. Its compact size (29 22 16.2 mm) and light weight (7.6 g) make it non-intrusive and easy to install. CE, RCM and FCC ID: N4ZBS600 certifications confirm the kit's high quality and compliance with applicable safety and quality standards. In addition, the ability to update the software online ensures that your kit will always be up to date with the latest features and fixes.
