

Wireless Vertical Mouse Delux M618DB BT4.0 + 2.4Ghz 4000DPI

Ref: 6938820408185

Wireless Vertical Mouse Delux M618DB BT4.0 + 2.4Ghz 4000DPI

Welcome a change

Welcome a new level of computer comfort with the Delux Vertical Mouse. What are the advantages of this setup? The handshake position of vertical mice means your wrist doesn't bend as much from side to side, and your forearm has less rotation around its axis. Thus, the M618DB vertical mouse will reduce your muscle fatigue, reduce wrist pain and reduce the risk of carpal tunnel disorder. In addition, the mouse features an accurate DPI sensor and 6 buttons that can be programmed as you wish.

Work at an angle

Increase the comfort of your work by holding the mouse at a comfortable and more natural 57-degree wrist angle, which minimizes muscle tension and puts less strain on your hand. In addition, the mouse is very pleasant to the touch, so its use is pleasant and much more effective in operation.

Two ways

The mouse can work wirelessly in two modes, using Bluetooth 4.0 or 2.4G radio communication for connection. Experience the freedom of a vertical wireless mouse. Change the DPI sensitivity with the buttons and increase the precision of your work. Match the DPI to the current game and outperform your opponents with the accuracy of every action!

Spacious battery

With a built-in 500 mA lithium-ion battery, you'll be able to enjoy uninterrupted use of the mouse without worrying about running out of power. When you are done working, just plug it into the USB cable.

RGB for style

The rainbow backlighting on the top of the mouse, is not only a decoration, but makes visible the unique and unrepeatabe character, of this unusual mouse.

Precision Adjustment

Move your cursor around the screen with the speed and precision you need. Choose the right DPI from the following available: 800/1200/1600/2400/4000. Select the optimal settings for your use and increase your effectiveness.
