Smart Scale with 13 Body Measurement Functions Yunmai Pro M1

Intelligent scale with 13 body measurement functions Yunmai Pro

Yunmai Pro is an intelligent scale that will assist your whole family in taking care of their health and proper weight. Thanks to modern sensors it can detect 13 factors of your body to indicate you the areas that need improvement.

Even lighter

The design has been simplified, abandoning the traditional metal contact measurement and uses an ITO coating process to perfectly integrate the entire scale surface with the BIA bioresist, which is better in terms of performance and aesthetics.

Even more accurate

Yunmai Pro is designed to work with BIA chip and bioelectrical impedance analysis and work with Yunmai health data cloud. Each measurement will be intelligently matched and verified with the data characteristics of millions of users in the cloud, resulting in more accurate and reliable measurement results.

For the whole family

Yunmai Pro can be your health manager for the whole family and can identify them. When Bluetooth is connected to the weight measurement, the data in the measurement history will be automatically synchronized and uploaded to the cloud for permanent storage,

so you can keep a record of changes in your family's health.

Track your progress

Weight sensing can be done without carrying a cell phone. Yunmai S can intelligently identify individual family members (up to 10 people). When the next Bluetooth connection is used for weighing, historical data will be automatically synchronized with the palm of your hand and uploaded to the cloud for permanent storage, recording the results all the time.

Made for use

In addition to its durable housing, the scale features four high-precision pressure weighing sensors. You can easily read the measurements on the subtly placed LED display, whose bright digits will be visible even in a dark bathroom. You can take the scale with you if your workouts involve travel, and the 1000 mAh battery will keep it running for up to 180 days on a single charge.

180 days on a single charge

You won't have to worry about batteries for your scale anymore. The built-in high-quality 1000mAh lithium-polymer battery, charged via MicroUSB standards, provides 180 days of scale use, on a single charge.

Dedicated application

Download the app to your smartphone and record every change in real time. Track the changes in your body, compare them with others and bring a touch of competitive weight loss to your workouts.

Instruction manual

Body Mass in the range of 6kg to 180kg, with an accuracy of 0.2 kg

BMI with an accuracy of 0.1%

Body fat in the range of 5%-75%, with an accuracy of 0.1%

Hydration in range of 15%-70% with accuracy of 1%

Body weight without fat with accuracy of 0.2 kg

Bone mass with accuracy of 0.2%

BMR

Subcutaneous fat mass with accuracy of 0.2 kg

Visceral fat index with accuracy of 1-30

Body age with accuracy of 1 year

Body protein with accuracy of 1%

Muscle mass in range 15%-70% with accuracy of 0.1%

Skeletal muscle mass

Included

Yunmai S scale

USB cable

Instruction manual

Wireless connection:

Low Power Bluetooth 4.0

Power supply

1000mAh Li-Polymer Battery Micro USB

Display

2.63-inch hidden LED display

Sensor

Pressure sensor×4, biological sensor×4

Preço:

€ 40.50
