

Gaming headphones Havit Fuxi H3 2.4G (white)

Ref: 6939119064402

Gaming headphones Havit Fuxi H3 2.4G (white)

Havit Fuxi H3 2.4G Gaming Headphones (White)

Havit Fuxi H3 are headphones with an interesting design, characterized by low latency of 24ms, so that no opponent can surprise you. Large 40-millimeter speakers provide thrilling experiences while listening to music and playing - thanks to a 600mAh battery, you can enjoy them for up to 26 hours. The comfortable design, padded with soft material, and ear cups filled with memory foam will ensure your comfort all this time. Meanwhile, the omnidirectional microphone will capture your voice well, so you can communicate smoothly with your team.

Impressive Operating Time

The integrated circuit used in Fuxi H3 is characterized by low power consumption and high efficiency, resulting in a long operating time of the headphones. The 600mAh battery gives you 23 hours of operation at 2.4GHz connectivity and 26 hours with Bluetooth connection, so Fuxi H3 can accompany you in every game.

Custom Dynamic Speakers

The 40mm speakers used in the headphones, with a range of 20Hz - 20kHz, have been meticulously refined by the Havit team, allowing you to enjoy non-standard stereo sound facilitating immersion into music and the presented world.

Low Latency

Speed and agility are important features of every player, just as low latency is an important feature of every gaming headphone. The Broadcom integrated circuit provides a latency of only 24ms, which is comparable to that achieved with wired connectivity. Don't limit your movements and play wirelessly with Havit Fuxi H3!

Omnidirectional Microphone

Havit headphones are equipped with a 360-degree omnidirectional microphone that you can detach and attach at any time. It connects to the headphones with a 3.5mm mini jack. Communicate effectively with your team thanks to Havit Fuxi H3!

Quadruple Connectivity

Among the advantages of the headphones is also multi-channel connectivity. You can connect devices via a 2.4GHz USB-C wireless hardware key, but also via a cable with a USB7.1 end or a 3.5mm mini jack. However, if you prefer wireless connectivity, Bluetooth is also an option.

Ergonomic Shape and Pleasant Materials

The icing on the cake is the ergonomic shape of the headphones and a light weight of 186.6g, ensuring that even prolonged use will be comfortable. Additionally, you can adjust the headband so that the ear cups filled with memory foam, covered with breathable material, fit your head as best as possible.
