The Havit MS959S RGB Wireless Gaming Mouse (brown).

The MS959S is a programmable wireless mouse from Havit that is designed for gaming. It has a professional gaming PMW337 chip, 8 buttons whose functions you can change and 6 DPI resolutions - from 1,200 to 12,000! It is also distinguished by its ergonomic design with striking RGB backlighting achieved by seven LEDs giving 16 million colors.

Wide range of resolutions

The mouse offers up to 6 resolutions to choose from - 1,200, 2,400, 4,800, 6,200, 8,000 and 12,000, so you can choose the one that suits you best and win even more effectively! You can easily click between the different values with your thumb using the key with the signature "DPI" located on the left side of the mouse.

Striking lights

Spice up your nighttime gaming marathons with the MS959S - the mouse will light up your desk with 16 million RGB colors that will flow under your hand as you play! With the help of Havit software, you can change the lighting effects and customize them to your taste.

Ergonomic design

A design that is comfortable for your hand is one of the components of success. The Havit mouse has a non-slip surface to give you full

control of your character and avoid accidental clicks or the device slipping out from under your hand. The ergonomic design makes even hours of using the mouse comfortable for your hand.

Forward/reverse function

The Havit MS959S has keys on the left side to reverse and redo your actions to reduce situations where you have to move the cursor to the far edges of the screen. This is especially convenient when browsing the Internet.

High-performance chip

PMW3327 is the chip built into the Havit mouse - it features high performance and captures even the smallest changes at a DPI resolution of 12,000.

8 programmable buttons

With the Havit mouse, you can simplify your tasks and increase your productivity and efficiency while gaming. The 8 programmable buttons are waiting for you to give them your own settings and win without a hitch!
