Mechanical keyboard Royal Kludge RK100 RGB, Red switch (blac

Royal Kludge RK100 RGB Mechanical Keyboard, Red switch (black)

Are you looking for a proven piece of equipment that is perfect equally for work and entertainment? Royal Kludge mechanical keyboard will be the perfect choice! It will adapt to you in every way, as you can not only freely exchange switches in it, but also connect to it in different ways. What's more, its well-thought-out design will ensure uninterrupted comfort during use, and its built-in rechargeable battery will ensure long working time.

Thoughtful design

What sets the Royal Kludge keyboard apart is its well-thought-out design. It was created with durable materials, so it demonstrates great durability and resistance. What's more, its multi-layered structure allows reducing noise, so it will work quietly and won't disturb other people in the room. It is equipped with 2 additional USB-C ports that you can use for charging and data transfer.

With gamers in mind

The keyboard uses anti-ghosting technology, which counteracts the lack of correct response to pressing several buttons at the same time, so you will be able to play freely and always respond in time. In addition, it uses red switch. They will make the use of the keyboard more pleasant and quiet. They will be perfect equally for gaming fans and those who are looking for a keyboard suitable for work.

Tailored to your needs

The Royal Kludge keyboard will adapt to your needs. In the dedicated PC application, you can change its settings according to your expectations. Among other things, you will be able to change the application of the keys or choose the backlighting you are interested in. This will personalize the keyboard and make your work even more comfortable!

Multiple connectivity options

Royal Kludge responds to the needs of users and gives you the opportunity to connect to the keyboard in as many as 3 different ways! If you are a fan of traditional solutions - choose a wired connection, using a cable. However, if you want to get rid of tangled wires, connect to selected devices using a 2.4 GHz network or Bluetooth (in which you can connect to as many as 3 devices simultaneously). What's more, you can conveniently switch between connected devices, thanks to a special switch, located on the keyboard.

Long operating time

Worried that your keyboard will lose energy at the least opportune moment? With the Royal Kludge you can abandon those fears! It is equipped with a 3750 mAh battery, so it can work for about 250 h. What's more, special light indicators will inform you about the current operation of the device.

RGB backlighting

Give your work more colors! The Royal Kludge keyboard is equipped with RGB backlighting, which includes as many as 16.80 million colors. What's more, there are also 14 different modes at your disposal. Customize the colors for your current mood or gameplay and give your keyboard a unique look!

High compatibility

The Royal Kludge device exhibits high compatibility, so you don't have to worry that it won't work with your hardware. It works with phones, mice, headphones, however, not only! You also don't have to worry about the operating system you use, as this keyboard will work with Windows, iOS/ Mac OS, Android and Linux. Enjoy exceptional freedom!
