

## Smart Wi-Fi Switch Sonoff MINI R2

Smart Wi-Fi Switch Sonoff MINI R2

Ref: 6920075776195

Smart switch Sonoff MINI R2

Smart Wi-Fi switch Sonoff MINI R2 gives you even more possibilities to manage your smart home. Despite its small size it impresses with powerful operation. It allows you to control devices by voice or application, and thanks to DIY mode you can adjust it to your needs even better. It also allows you to connect external switches. It ensures the safety of use and is very easy to install.

Works in a variety of configurations

The device can work with various types of external switches, such as SPDT or NC/NO. Thanks to its small size, you can install it in various types of switch boxes. It is also compatible with the European standard. It is suitable for configuration of staircase switches or door switches. MINI R2 also works perfectly with lighting. Following mode makes light perfectly compatible with wall switch.

An app to make your life easier

Do you want additional possibilities? Use the eWeLink app and control your devices remotely. You can also create strict work schedules for them. What is more, Sonoff MINI R2 is compatible with Amazon Alexa and Google Assistant, so you can also control your smart equipment with voice commands. You can also create advanced smart scenes.

Share control

This is not the end of the possibilities that the app gives you. You can share the selected devices with other household members so that they too can enjoy their convenient remote control. Share the control with your family or friends - they will appreciate the chance to manage smart appliances from their smartphones.

Even more possibilities with DIY mode

Slightly more advanced users can further customize the Sonoff switch to their expectations. A special DIY mode allows you to use the REST API to connect the MINI R2 to your already existing smart home management system.

Enjoy safe use

Sonoff MINI R2 is safe to use, which is confirmed by ANATEL certificate. The product has also passed 2KV tests. What's more, the S1 and S2 ports have been marked in grey to help you remember not to connect them with high current. The switch's external antenna has been placed inside the switch to enhance the performance and safety of the device.
