

Motion sensor base Sonoff (PIR3, SNZB-03)

Motion sensor base Sonoff (PIR3, SNZB-03)

Ref: 6920075775389

Motion sensor base Sonoff (PIR3, SNZB-03)

The base is compatible with the Sonoff SNZB-03 and Sonoff PIR3 sensors. The universal connector enables you to rotate the base horizontally by 360° and vertically by 90°. This way, you can position the sensor at the optimal angle. Note, that the sensor attached to the cradle does not move by itself.

Universal connector

Additionally, you can position the sensor where motion is difficult to detect by simply attaching the sensor to the universal connector and rotating the connector head to get the best motion detection angle. However, the universal connector is not included and must be purchased separately.

Brand

Sonoff

Name

Motion Sensor Base

Compatibility

PIR3, SNZB-03

Rotation angle

360°, 90°

Colour

White
