

Blackhead remover ANLAN X7 ALHTY03-01R

Blackhead remover ANLAN X7 ALHTY03-01R

Ref: 6953156300354

Anlan X7 mustache extractor

Anlan X7 will allow you to not only get rid of mustaches, but also tighten your pores and rejuvenate your skin. With 5 interchangeable tips, 3 suction modes and 2 light beams, you can easily adjust the device's action to your needs. Equipped with an LED display, this product is easy to use, lightweight and portable.

Negative pressure for thorough cleaning

One of the reasons behind the device's effective performance is its technology that uses negative pressure to effectively cleanse the skin. Thanks to it, Anlan X7 eliminates blackheads, acne, dead skin cells and various types of impurities with impressive accuracy. So by using this multifunctional product, you can enjoy a clean, smooth, dazzling complexion.

3 levels of suction

Adjust the suction power to your needs. Low level will work well for delicate skin. The medium level is perfect for removing clearly visible blackheads - you can use it every day. Use the highest level for more difficult dirt and oily skin, such as around the nose.

Fantastic properties of red and blue rays

The device also uses the power of light to improve the condition of your skin. The blue ray narrows pores. This gives your complexion a

smooth and healthy, beautiful appearance. The red ray, on the other hand, promotes skin rejuvenation. Take advantage of the Anlan mustache extractor and take care of your face.

Interchangeable tips for special tasks

In the set you will find up to 5 interchangeable tips. They are not only for massaging with red and blue light rays, but also for a number of other uses. The oval tip helps smooth wrinkles and gives vitality to the skin. The round tip with added silicone removes dirt, grease or cosmetic residues. And the large round tip effectively eliminates blackheads and impurities - use it especially on the T-zone.

Excellent design

The product is small and lightweight - you can easily fit it in your purse and take it anywhere you want. It's also extremely practical - its filtering sponge can be washed and thus reused without worry. You can conveniently charge the device via USB cable with a charger, powerbank or even your laptop. You will be informed about the status of the battery by a practical LED display, which also indicates the current suction level, among other things.
