SVEN SPS-604 4W USB Speakers (black)

SVEN SPS-604 speakers not only provide sound, but also make an interesting addition to the space where you choose to use them. This model is the perfect combination of excellent sound, unique design and practical solutions that create a smooth and enjoyable user experience. Designed to fully satisfy the user's needs, it features built-in microphone and headphone jacks that further enrich the user's experience.

Fantastic sound

The speakers' output power is 4 watts (2 × 2 watts), which may be surprising given their compact size. However, thanks to the wooden cabinet and magnetic shielding, the sound is clear and full, covering the range from 90 Hz to 20,000 Hz. This makes it possible to enjoy balanced, high-quality sound even in a small space.

Practical solutions

SVEN speakers are equipped with 2 practical outlets. The microphone jack allows you to easily connect a microphone, which is especially useful for video conferencing, online calls or audio recording. There's also a headphone jack at your disposal - perfect for when you want to immerse yourself in your favorite music, podcasts or movies without disturbing other household members.

Wooden cabinet

The cabinet of the SVEN SPS-604 speakers is made of MDF wood - a material that not only contributes positively to sound quality, but also gives an elegant look. This combination of classic and modern makes these speakers an ornament both at home and in the office.

Convenient operation

The front panel of the active speaker is designed with user convenience in mind. The volume control knob, power indicator and headphone and microphone jacks are all within easy reach, making it quick and easy to operate the speakers. Powered by a USB cable, the SVEN SPS-604 not only offers exceptional sound quality, but is also extremely practical and convenient to use.
