

Robotic Vacuum cleaner Roidmi EVE CC

Robotic Vacuum cleaner Roidmi EVE CC

Ref: 6941762400056

Roidmi EVE CC cleaning robot

Let the Roidmi EVE CC do the cleaning for you. The robot effectively picks up dust and other debris with its 3,800 Pa suction force and rubber brush. What's more, it automatically returns to the station and empties the dust tank. It also offers a mopping function. In addition, it runs for up to 180 minutes, allowing you to clean more rooms without charging interruptions. With LDS navigation, it easily navigates around the apartment, and the Mi Home and Roidmi apps allow you to remotely control the robot and adjust settings.

Effortless dirt removal

Enjoy a dirt-free surface with Roidmi EVE CC. The robot effectively removes dust and fine debris with its 35W motor and 3,800 Pa suction power. In addition, the rubber brush prevents hair entanglement and thoroughly collects dirt accumulated in the crevices. The side brush, on the other hand, vacuums areas close to the walls for more effective cleaning. In addition, it has a mopping pad and a 290 ml water tank, so it will clean about 150 sq. m. in one go. So you don't have to stop cleaning to refill the water in the tank.

LDS smart navigation

Experience how the EVE CC efficiently navigates your apartment. The robot uses LDS intelligent laser navigation to accurately scan rooms and quickly map them (about 5 minutes). In addition, it finds itself brilliantly in poorly lit rooms. What's more, it overcomes obstacles up to 17 mm high and automatically detects stairs and then avoids them. Use the Roidmi EVE CC without worrying about damaging it.

Automatic tank emptying

You no longer need to empty the dust tank manually. When needed, the robot will return to the station to remove dirt from it. The clever design of the air duct means that emptying the tank will only take 15 seconds. You also don't have to worry about annoying noise - the process is extremely quiet. In addition, the capacity of the tank is 2.5 liters, which reduces the frequency of its replacement - enough for about 60 days. Enjoy the innovative solutions that the Roidmi EVE CC offers.

More convenient with the app

Download the Roidmi and Mi Home apps, available in the Google Play and App Store, and get more options. Conveniently start cleaning, manage room maps, set up virtual walls and regular cleaning, check notifications, battery levels and many more! Now you have all these functions at your fingertips.

In the set

- robot
- station
- side brush x2
- mop pad with handle x2
- filter x2
- dust and water tank 2in1
- dust bag x5
- cleaning brush
- instruction manual

Manufacturer
Roidmi
Model
EVE CC
Color
white

Suction power
3800 Pa

Rechargeable battery
lithium

Rechargeable battery capacity
3200 mAh

Working time
approx. 180 min

Input voltage
220-240V, 50/60 Hz (station)

Power
700 W (station), 40 W (robot)

Output voltage
24 V/1.2 A

Rated voltage (robot)
14.4 V

Weight
approx. 2.8 kg (robot), 2.6 kg (station)

Dust bag capacity
0.26 l (robot), 2.5 l (station)

Water tank capacity

approx. 290 ml

Noise level

76 dB(A)

Dimensions

275 × 293 mm (station), 325 × 325 × 97 mm (robot)

Application

Roidmi, Mi Home

System requirements

Android 5.0 (or later), iOS 10 (or later)

Connection

Wi-Fi 2.4 G 802.11b/g/n

Preço:

Antes: € 349.0002

Agora: € 321.01
