Ref: 6972860172101

Lens waterproof filter set Telesin for GoPro Hero 9 / Hero 1

Telesin GP-FLT-904 filter set for GoPro Hero 9 / Hero 10 / Hero 11

The Telesin brand filter set for GoPro Hero 9 / Hero 10 / Hero 11 will allow you to create even more beautiful shots underwater. Easy to install and durable - they will serve you perfectly. With their help, you will get rid of color bias and make your photos and videos delight everyone with beautiful, vivid and natural colors. The filters should be used with the waterproof housing for the GoPro Hero 9/10/11 by Telesin.

Red filter - when you dive in the sea

The red filter will work well at depths of about 5-25m. It is best suited for use in sea water. It corrects color deviation and can solve the problem of unnatural green tones in underwater shots.

Pink filter - perfect for snorkeling enthusiasts

You will use the pink filter when diving in the sea at a depth of 5-25 m. It will be especially useful for snorkeling enthusiasts. It helps correct color deviation and eliminates blue discoloration in photos and videos.

Purple filter - the best for recording in the freshwater

Maybe you prefer diving in freshwater? In that case, a purple filter will work perfectly. Use it at depths of 5-25m to correct color deviation

and avoid unwanted greenish tones on the materials you create.
