

Hardwire Kit DDPAI for OBD port

Hardwire Kit DDPAI for OBD port

Ref: 6934915204014

DDPAI Hardwire Kit power adapter for OBD port

Easy to install and use power adapter designed for DDPAI MINI 5, Z40, Z50, N3 Pro, etc. cameras. Allows you to activate the recording function while stationary. It intelligently recognizes voltage and has 5 levels of protection, making it completely safe to use. The cable is also compatible with electric cars.

Easy installation

The adapter is equipped with an OBD diagnostic connector, so you don't have to remove the cover to get to the fuse box when you want to install it to your car camera. As a result, you get an even more stable and secure power supply.

Monitor your vehicle while parked

The adapter allows you to use the recording function while parked. As soon as you park, your car camera will automatically activate the Standstill mode and record all unwanted situations.

5 levels of protection

The device offers 5 levels of protection to keep your vehicle and the video recorder completely safe. So you don't have to worry about under- or over-voltage, short-circuit, overcharging. The adapter also has reverse connection protection, so your possible mistake during

installation won't harm your camcorder.

Intelligent vehicle protection

The adapter is equipped with an intelligent IPS power management system. As a result, it constantly monitors the voltage of the car battery and if it falls below a safe threshold, it automatically cuts off power to the camera.
