Safety Carrying Case PGYTECH for DJI Air 3 (P-45A-010)

PGYTECH Waterproof Case for DJI Air 3 (P-45A-010)

Looking for a convenient and secure way to transport your DJI Air 3 drone? The spacious PGYTECH case is exactly what you need! With an IP67 waterproof rating and durable materials, it can withstand shocks and impacts without a problem. Specially designed compartments help you keep everything organized, and the built-in pressure valve enhances safety in almost any conditions.

Optimal Organization with Special Compartments

This case allows convenient storage of your DJI Air 3 setup. You no longer need to transport your drone and accessories separately! Thanks to the carefully designed product construction, you can easily maintain order. The case has special compartments for the DJI Air 3, intelligent batteries, filters, cables, and charging hubs. You can even store the remote controller without removing the propellers and rods!

Unmatched Stability

The compartments in the case not only help you organize space optimally but also provide additional protection for the devices inside. High-quality EVA foam fits perfectly around the drone and accessories, preventing them from falling out and protecting them from shocks. This ensures that your equipment remains securely in place, even on bumpy roads!

Suitable for Almost Any Conditions

The PGYTECH case can handle even extreme weather conditions. Its IP67 waterproof rating means you can submerge it in water up to 1 meter deep without any worries! The product also features a special valve that allows for safe opening even in situations with significant pressure differences, such as changes in altitude. Take your drone on your next adventure with confidence that it's well-protected during transport!

Theft Protection

This product also helps you secure your drone against theft. It's equipped with reinforced locks that provide reliable closure while allowing convenient access. Moreover, the dual holes enable the use of additional padlocks, further enhancing the security of your equipment and giving you peace of mind!

Practical and Durable

This practical case will serve you well for many years. It's made from durable, damage-resistant materials, making it highly resistant to corrosion and wear. You can confidently use it in extreme temperatures, ranging from -25°C to even 60°C. The ergonomic, non-slip handle makes carrying the case a breeze.
