PGYTECH OneMo FPV 30L Photography Backpack (Black)

Are you a professional photographer who loves capturing photos in the field? The PGYTECH OneMo FPV backpack is the answer to your needs! With a 30L capacity, you can easily fit all your photography gear inside, and its thoughtful design ensures quick and convenient access to all your equipment. It comes equipped with special compartments and numerous pockets to help you stay organized. It's incredibly durable, making it suitable for even the most demanding photographic challenges.

All Your Gear in One Place

You no longer have to choose what to bring with you - now everything can fit in one backpack! With a 30-liter capacity, this backpack can easily accommodate multiple drones, remote controllers, goggles, and a bag for safely storing batteries. To further enhance organization, the backpack features customizable compartments, allowing you to have full control over its interior layout, tailored to your individual needs.

Well-Thought-Out Design

The backpack is designed to provide convenient access to your gear. The main compartment allows you to pack your equipment flat, making it easy to reach for the accessories, even those at the bottom of the backpack. The front flap is equipped with flexible straps for securely attaching drones. Furthermore, the innovative design of the backpack allows for easy removal of equipment from the main

compartment without the need to take the drones off the front flap.

Attention to Detail

The PGYTECH OneMo FPV backpack is crafted with attention to the smallest details. It features many practical pockets that are perfect for storing small accessories like memory cards, antennas, cables, and more. On the front flap, there's a designated landing pad for your drone, and the left pocket allows for safe storage of your smartphone. Inside the backpack, you'll also find dedicated space for a laptop and a discreet pocket for an AirTag.

Designed for Your Comfort

Ensure your comfort during long expeditions and photography sessions! The OneMo FPV backpack perfectly conforms to your back's shape and provides excellent ventilation, preventing sweat buildup. It features a detachable chest strap and additional straps that stabilize the backpack and evenly distribute the weight, relieving strain on your spine. Moreover, specially designed EVA foam shoulder straps offer even greater comfort.

Ready for Any Adventure

This backpack is made using high-quality materials and coated with a special PU layer, making it exceptionally durable. It's also water-resistant, so rain won't be a concern. Furthermore, the zippers on the backpack are carefully designed to enhance security and make it difficult for unauthorized individuals to access your equipment.
