

Parking heater HCALORY M98, 8 kW, Diesel, new version

Ref: 5905316148253

Parking heater HCALORY M98, 8 kW, Diesel, new version

Standby Heating / HCALORY M98 Heater

The HCALORY M98 is a diesel-powered heater that allows for quick warming of a garage, car interior, or defrosting windows to efficiently remove snow and ice. The heater operates quietly, ensuring a comfortable traveling environment. It heats up even at temperatures as low as -40°C and works at temperatures up to 50°C.

Intuitive Operation

With an LCD panel and control via five buttons, the HCALORY M98 is user-friendly, even for less experienced users. The panel allows for easy monitoring and operation, and an included remote control with a range up to 50 meters further enhances user convenience. Leveraging technology not only simplifies heater functions but also supports efficiency and safety by notifying about error codes. Easily adjust the power between 5 to 8KW, set the temperature from 8 to 35°C, or set a timer that turns the device on or off after a specified time.

Energy Efficiency

The HCALORY M98 boasts low fuel and electricity consumption while providing high operational performance. With adjustable consumption settings, this heater ensures an economical and wallet-friendly solution while promoting environmental care by minimizing emissions and consumption. It incorporates overheat protection technology that automatically cuts off power if the temperature becomes

too high.

Quiet Operation with Effective Performance

This heater not only warms spaces effectively but does so without being a disturbance to the user or the environment. Advanced noise-reducing technologies ensure its operation is discreet and unintrusive, particularly important during long travels or nighttime work hours. The low noise output guarantees comfort in both warmth and sound.

Easy Installation and Maintenance

With a compact design and intuitive installation process, another advantage of the HCALORY M98 heater is evident. This makes it possible to fit the device in various, even constrained spaces, making it a versatile solution for diverse mechanical vehicles - from cars and buses to trucks and engineering vehicles. Furthermore, ease of cleaning and maintenance, including the ability to disassemble the fuel pump, renders this model a user-friendly ally.

Package Contents

Heater & User Manual

LCD Panel

Air Filter

Remote Control

Muffler

Intake Pipe

Exhaust Pipe

Air Outlet Pipe

Large Silver Screws x 4

Smaller Copper Screws with Caps x 3

3 Nuts

Clamp Band for Screws

Adjustable Large Clamp Band x 2

Adjustable Small Clamp Band x 4

BrandHCALORY

ModelM98

Dimensions38 x 27.5 x 25.5cm

MaterialMetal, Plastic

Fuel Tank Capacity5l

Operating TimeApprox. 10h

Rated Voltage12V

Rated Power5~8KW

Temperature Range Offered8°C to 35°C

TimerYes

Fuel Consumption0.1-0.48L per hour

Wireless Control Range50 meters
