Fan control box for computer Aigo APC1 RGB PWM + remote cont

Ref: 5907489609197

Fan control box for computer Aigo APC1 RGB PWM + remote cont

RGB/PWM Module for PC Darkflash APC1
The Darkflash APC1 PWM controller is responsible for controlling the operation of your computer's fans. It offers support for 14 backlight effects and motherboard compatibility. It has several ARGB and PWM ports.

Functionality first
The module provides control over temperature and fan speed via the PMW/FG port. Moreover, it has 6 ARGB ports, 5 PWM ports and support for synchronization with ASUS, MSI, GIGABYTE and ASROCK motherboards. This way you will merge the backlighting effects with other ARGB products.

Backlight Control
APC1 provides you with the ability to synchronize the lighting effects via an external signal. Simply use the RESET port to switch the signal reception to PC mode. All for your convenience! *Note* This unit does not work with 12 V / 4 Pin ports.

Remote control included
The controller comes with a remote control that allows you to conveniently operate the device. You can use it to change the color and backlighting mode or to synchronize the APC1 with the motherboard.

Included:
Controller
RGB signal cable
Remote control
Manufacturer
Darkflash
Model
