

## Portable Label Printer Niimbot D11 (Black)

Portable Label Printer Niimbot D11 (Black)

Ref: 6972842748126

Niimbot D11 portable label printer (black)

The Niimbot D11 allows you to print labels without using ink. It works wirelessly and features a compact design. Its resolution is 230 dpi. It connects to a compatible device via Bluetooth, and operation is facilitated by a dedicated app. What's more, you'll find a charging cable and one roll, which is enough for 160 labels.

Useful for everyday use

The Niimbot D11 portable printer will make organization easier both at work and at home. You'll use the labels to label document folders, cables, food or cosmetic containers. It will also allow you to print product prices, mark them with EAN codes and expiration dates. What's more, the labels are free of harmful BPA.

Dedicated application

Operation of the printer is facilitated by the Niimbot app, which is compatible with Android and iOS. From it, you will print the contents of the labels with the font style and size of your choice, add emoticons, product barcodes, QR codes and tables. You can also create serial printing, product expiration dates, etc. Enjoy the freedom of use with the D11-B.

Lightweight and compact

The printer is distinguished by its portable design - its dimensions are 132 x 79 x 29 mm, and its weight does not exceed 182 g. You will successfully store it, for example, in a desk drawer. What's more, it works wirelessly - it is equipped with a 1500 mAh battery, and the included micro USB cable will facilitate charging. What's more, it was equipped with a practical lanyard, which makes it easy to transport the product.
