

Intelligent Food Dispenser Petoneer Nutri Mini

Intelligent Food Dispenser Petoneer Nutri Mini

Ref: 6930460006578

Petoneer Nutri Mini Intelligent Food Dispenser

Petoneer Nutri Mini is an intelligent food dispenser designed for cats and small dogs. It is designed to keep the food stored in it fresh for a long time. Set feeding schedules or give your pets food remotely - using the app. Capacity of 2.6l is enough to provide your pet with meals for up to 2 weeks. So you can without fear go on a short trip, stay longer at work or go to an all-night party - your pet will not run out of food!

Take care of your pet's proper diet

Few pets can deny themselves a tasty treat. However, greed most often leads to overweight and health problems for pets. To avoid this, plan an optimal feeding schedule using the Petoneer app. This will ensure that your pet is neither hungry nor overeats!

Remote control with app

The app gives you even more possibilities. It allows for convenient, remote control of the dispenser from anywhere in the world. With its help you can not only plan the schedule of meals, but also, for example, give your pet an extra portion. With just one touch, you can reward your pet with a delicious treat!

Don't worry about blocking the dispenser

The dispenser is designed to minimize the risk of blockage. The powerful motor and properly mounted impeller are resistant to damage and prevent the dispenser from clogging. The Nutri Mini mechanism is also extremely low-wear. However, if somehow there is a blockage in the dispenser, you will receive an immediate notification in the app and gain the ability to react instantly. Your pets will always have access to delicious food!

Sufficient for up to 2 weeks of feeding

The dispenser has a capacity of 2.6l, which allows you to fill it with about 1.2kg of food. This is enough to feed your pet regularly for about 10-15 days. Do not worry that you will forget to refill the dispenser. It is equipped with intelligent sensors that detect how much food is left. When there is very little of it left, a red LED light will illuminate. You will also receive an appropriate notification in the app.

Emergency power supply capability

The device is powered by a USB-C cable. You can also put 4 LR14 batteries in it to provide an emergency power source in case of a power outage. You don't have to worry about your pet not getting food due to unforeseen circumstances. Petoneer Nutri Mini will never let him down. Note: batteries are not included - please purchase separately.

Easy to clean and safe for pets

The Nutri Mini's modular design means that you won't even have a problem cleaning it. When you reassemble the dispenser, you don't have to worry about its stability either - all the elements will be firmly stuck in the right places. The bowl and food container are made of durable materials that are safe to use with food. The Nutri Mini is therefore friendly to your pets' health.

Always fresh food

Fear that food left in a container for a long time will lose its freshness? Don't be! The high quality 360° silicone seal effectively blocks the flow of air and significantly slows down the process of food oxidation. What's more, the Nutri Mini is also equipped with a desiccant to prevent moisture build-up and food spoilage. So your pet can always enjoy healthy, fresh food.

Carefully considered design

A special locking mechanism minimizes the risk of accidentally opening the dispenser lid. This way you can be sure that your pet will not steal the treats. What's more, the practical anti-slip pads prevent the dispenser from sliding. So your pet can eat its food comfortably. The perfectly thought-out design of the Nutri Mini ensures comfort for both you and your pet!
