Ref: 6933138600009

LDNIO Y1 Sensor Night Light

Make it easier to move around your home in the dark. Don't worry about tripping or falling over something! The LDNIO Y1 lamp will provide you with eye-friendly lighting with a color temperature of 3500K, the brightness of which can be adjusted. It also has a built-in light sensor, thanks to which it automatically adjusts its operation to the ambient conditions. In addition, the device guarantees low energy consumption and features a stylish design.

Wide range of application possibilities

LDNIO Y1 lamp will find many applications in any home. It will prove useful, for example, in the hallway or bedroom, it will also come in handy near the stairs. You no longer have to worry about hitting something in the dark! Also, don't be afraid that by turning on the large lamp, you will wake up the other household members. LDNIO bedside lamp will light your way in the dark! You can also use the device in the room of a child who doesn't like darkness.

Smart light sensor

The Y1 is equipped with a smart light sensor, so it can adjust its operation depending on the ambient conditions - automatic mode allows it. All you have to do is turn it on, and the lamp will spontaneously provide you with illumination when it starts to get dark. When the room gets brighter, the device will turn off. This way you can be sure that the light shines when you actually need it!

Ensure optimal illumination

This small lamp will provide you with soft illumination with a color temperature of 3500K. It shines at an angle of 120° - it will easily illuminate every nook and cranny. What's more, the device emits light in a 360° range, so it's safe for your eyesight and won't tire your eyes. You can also adjust the brightness of the lighting. In addition, the Y1 remembers the last used settings (in automatic mode) and restores them the next time you turn it on. The lamp also allows you to dim or brighten the light gradually.

Tailored to your needs

The LDNIO Y1 lamp is incredibly compact and easy to use. All you have to do is plug it into an outlet and set your desired functions using the built-in button! The device is also very durable and resistant to wear and tear - its housing is made of durable, flame-retardant plastic. The lamp is also characterized by surprisingly low energy consumption - don't be afraid of high electricity bills!
