

Car holder with induction charger Mcdodo CH-1600 (black)

Ref: 6921002616003

Car holder with induction charger Mcdodo CH-1600 (black)

Mcdodo CH-1600 car holder with inductive charger (black).

Introducing the Mcdodo CH-1600 car mount, which is a revolutionary combination of wireless charging and convenience. Equipped with a dual coil, it guarantees maximum inductive charging performance of up to 15W, while keeping your device stable.

Convenient and secure mounting

The mount was created with your comfort in mind, which is why it offers two mounting systems: a suction cup for mounting on the dashboard and a clip for the air vents, ensuring convenient and flexible installation in any car. Durable ABS and PC materials guarantee long-lasting use and safety of the device while driving.

Innovative technology

Powered by advanced QC3.0/PD3.0 input, the mount provides optimal charging for compatible devices. Its unique feature is a capacitor that allows the holder to be opened and closed up to 3-5 times when the car is turned off, adding extra convenience during daily use.

Automation for easy control

The Mcdodo CH-1600 Induction Charger features an intelligent induction system that automatically opens and closes the handle mechanism, providing easy access to your device. This process not only makes it easier to operate with one hand, but also makes it safer

to use while driving.

Included

Car charger
