Magnetic Wireless Charger Mcdodo CH-2120 with Cooling Fan (black)

Ref: 6921002621205

Mcdodo CH-2120 inductive charger with fan (black)

Discover a new dimension of charging with the Mcdodo CH-2120 inductive charger, part of the "Cool Series". The unique design with a built-in fan and semiconductor provides fast cooling, keeping the device at an optimal temperature level during charging and use.

Magnetic design

The Mcdodo CH-2120 uses a magnetic mechanism with precisely aligned magnets to increase the efficiency of inductive charging. With up to 15W of charging support, you can quickly restore power to your devices without interrupting gaming or movie watching.

Support for fast charging standards

Compatible with PD/QC fast charging, the charger is equipped with an advanced input to enable charging with maximum efficiency. It offers a multi-level 15W/10W/7.5W/5W capacity to accommodate the needs of different devices.

Designed with entertainment in mind

The Mcdodo charger's design allows for effective fan noise reduction, which is especially important during gaming sessions or when watching movies - persistent noise won't distract you. In addition, the striking RGB backlighting will add a unique atmosphere to your entertainment.
