

Filters PolarPro Vivid Collection for DJI Mavic Air 2S (3-pa

Filters PolarPro Vivid Collection for DJI Mavic Air 2S (3-pa

Ref: 817465025963

Set of 3 filters for DJI Air 2S Vivid Collection

The Vivid Collection set includes 3 filters for DJI Air 2S, with which you can take fantastic shots even in difficult lighting conditions. They are a combination of 2 popular effects - ND and polarization. Lightweight, aluminum frame means the accessories will not weigh down the drone and will not affect flight time, and high-end CinemaSeries™ glass will allow you to get amazing effects. In the package you'll find ND8/PL, ND16/PL and ND32/PL filters, as well as a practical magnetic case to store them.

Excellent image quality and vivid colors

Create excellent quality shots even in bright and reflective environments. ND/PL filters reduce shutter speed and flare for clear, crisp images and beautiful, saturated colors in all conditions. What's more, the polarization indicators on the frames allow you to fine-tune the effects to your expectations. Vivid Collection will therefore satisfy the needs of even the most demanding creators!

3 types of filters - lots of uses

The filters included in the kit provide a wealth of possibilities. ND8/PL offers 3 stops of light control and polarization perfect for filming during the golden or blue hour. The ND16/PL gives you 4 stops of light control and will work well for shooting in the afternoon. The ND32/PL, on the other hand, gives 5 stops of light control and is perfect for shooting in very bright conditions.

Made for your drone

The filters are made from high-quality, durable materials, making them not only damage-resistant but also practical. The lightweight aluminum frames ensure that the accessories do not overly affect the weight of the drone, resulting in optimal flight time. And CinemaSeries™ glass features a low refractive index, providing neutral colors and unmatched optical quality.

Practical case included - safely transport your filters

With PolarPro you don't have to worry about damaging your filters during transport. The set includes a magnetic case that will help you take care of their safety. With its help you can conveniently store your accessories and protect them from damage. Simply put them into the case which you can then pack in your backpack and take with you on a trip or in the open air. You can always have the practical Vivid Collection filter set with you!
