Havit MP837 gaming pad

The Havit MP837 gaming pad was created with demanding users in mind. It was made of mesh fabric that ensures fast and precise mouse movement. The non-slip backing makes sure that the pad does not slide on the desk surface, and the stitched edges significantly extend its life. The product is also partially waterproof and easy to keep clean. Tests have proven that the graphics on the mouse pad do not interfere with the smooth movement of the mouse.
